

Trim System

All-natural, heart-healthy weight-loss system

Res-Q Trim System is an all-natural weight-loss system that will curb your appetite, burn fat and reduce the absorption of carbohydrates, as well as increase your energy level (contains no harmful stimulants!). In addition, **Res-Q Trim System** helps reduce sugar cravings and balance out blood-sugar spikes.

Its doctor-formulated combination of 15 carefully selected active ingredients includes all-natural green tea leaf extract, grapefruit, banaba leaf extract and the extremely rare and well-publicized South African hoodia gordonii, which acts as a natural appetite suppressant and energy booster. **Res-Q Trim System** can also help in maintaining ideal weight.

Addresses Metabolic Syndrome

The **Res-Q Trim System** will help enhance fat burning and encourage a controlled appetite by preventing carbohydrates from metabolizing into fat. These supplements will also address an important health issue known as Metabolic Syndrome, a set of conditions often found together and closely associated with insulin resistance. These include hypertension, central abdominal obesity (belly fat), high triglyceride level and glucose abnormality. These conditions can put a strain on your heart health.

We recommend that you take **Res-Q Trim System** in conjunction with a moderate exercise program and healthy diet plan to lose weight and improve your heart health.
